

Notice of

Upcoming Concrete Pour and Temporary Sidewalk and Road Closure

1501 Cherry Project, San Carlos

The 1501 Cherry Street project, recently completed its mass excavation and dirt off-hauling activity, as well as installation of shoring system. The project is entering the next phase of construction which includes a mat slab concrete pour.

The following date has been tentatively identified by the contractor as its scheduled concrete pour date:

Saturday, November 5, 2016 (weather dependent)

What to expect: Modified construction hours for the above date will be 7am to 6pm. The actual pour will begin at 8am. The Saturday pour and temporary closure of Cherry is critical to being able to stage concrete trucks adjacent to the site with minimal disruption to weekday traffic and pedestrian movement in that area. The early start is essential due to the volume of concrete being poured on that day. Local access to residents on Cherry will be maintained but limited. "No Parking" signs will be placed at midnight the day prior to the pour on both sides of Cherry and sidewalks adjacent to the site will also be closed for safety reasons. This concrete pour is weather dependent and therefore subject to change.
